Grown in:	Ireland

Choisya 'White Dazzler' is an astonishing new evergreen shrub variety. This unusual floriferous Choisya selection, which flowers not just once, but twice a year, not only attracts attention through its numerous clusters of small white flowers, but also through its scent of orange blossom. 'White Dazzler' grows to a compact, evenly branching evergreen shrub in your garden, but it also performs well in a patio container or as a small informal hedging plant.
