Flower: Metallic blue

Leaf: Silver green with red bracts at the centre of mature plants

Mature Size: 0.5m H x 0.5m S/Open clump forming

Preferred Location: Garden border/Rockery/Patio container

Likes: Sheltered location in full sun to semi-shade and free draining soil

Dislikes: Water logged soil and temperatures below -10°C

Grown in: Ireland

Fascicularia bicolor is a highly colourful plant with an exotic appearance. It originates in Chile where mature plants produce metallic blue flowers. It will thrive in a sheltered sunny position growing in free draining soil. Fascicularia bicolor is an ideal plant for containers and its exotic tolerant foliage will give great value winter and summer giving the added bonus of Scarlet Pineapple like flowers in the autumn on mature plants. It may take a season after planting for the outstanding flower and foliage colour to appear but its well worth waiting for. The exotic pineapple like foliage looks great even when the plant is not in flower.
