Dislikes:	Temperatures below -10°C
Grown in:	Ireland

Ophiopogon planiscapus 'Nigrescens' is an award winning and stunning plant with purple-green leaves that turn black when growing in full sun and well drained soil. It gives a spectacular contrast in the garden when planted in large groups or as part of a mixed planted arrangement on the patio or window box. A truly unique, versatile plant with the blackest foliage of all garden plants makes it a must for every garden, balcony or patio.
